

# Blockgram

Blockgram is the worlds first blockchain powered  
Telegram client

# Our Mission

999+ Telegram messages, scam bots, missed alpha, copy paste wallet addresses.

Translate instantly inside messages  
no paywalls, no switching apps

Blockgram was born to fix crypto communication make it safe, intelligent, and frictionless.

Send crypto directly in chat no wallet apps, no copy-paste

Keep what matters (your messages, contacts, and groups) while upgrading everything else

No crypto-native tools, users still copy paste wallet addresses like it's 2015.

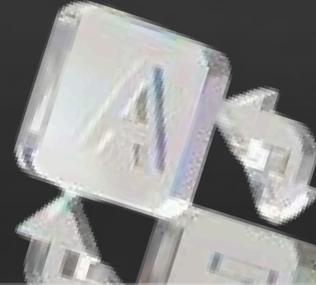

# The Problem

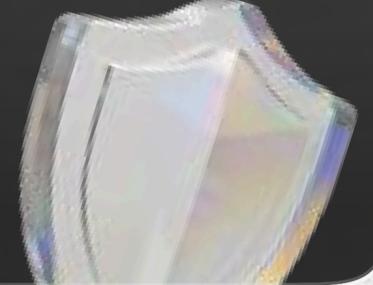

No crypto-native tools, users still copy paste wallet addresses like it's 2015.

Translation locked behind Premium global communities can't communicate freely.

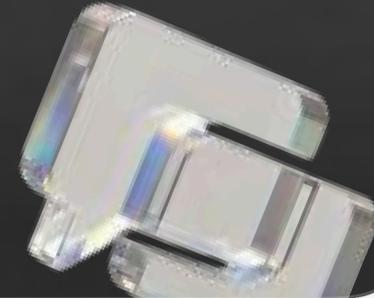

No built-in file scanner malware and phishing files spread daily.

Important alpha gets buried under 999+ messages of noise.

Groups overflow with spam bots scam DMs, and fake KOLs trust is broken.

Telegram gave crypto a home but not the safety, structure, or tools it deserves

# Our Solution

## Seamlessly Integrates with Telegram

Keep your messages, contacts, and groups while upgrading your experience

## Seamlessly InAI-Powered Alpha Summaries Condenses:tegrates with Telegram
